SHEETAL
A Timeless Bond

About us

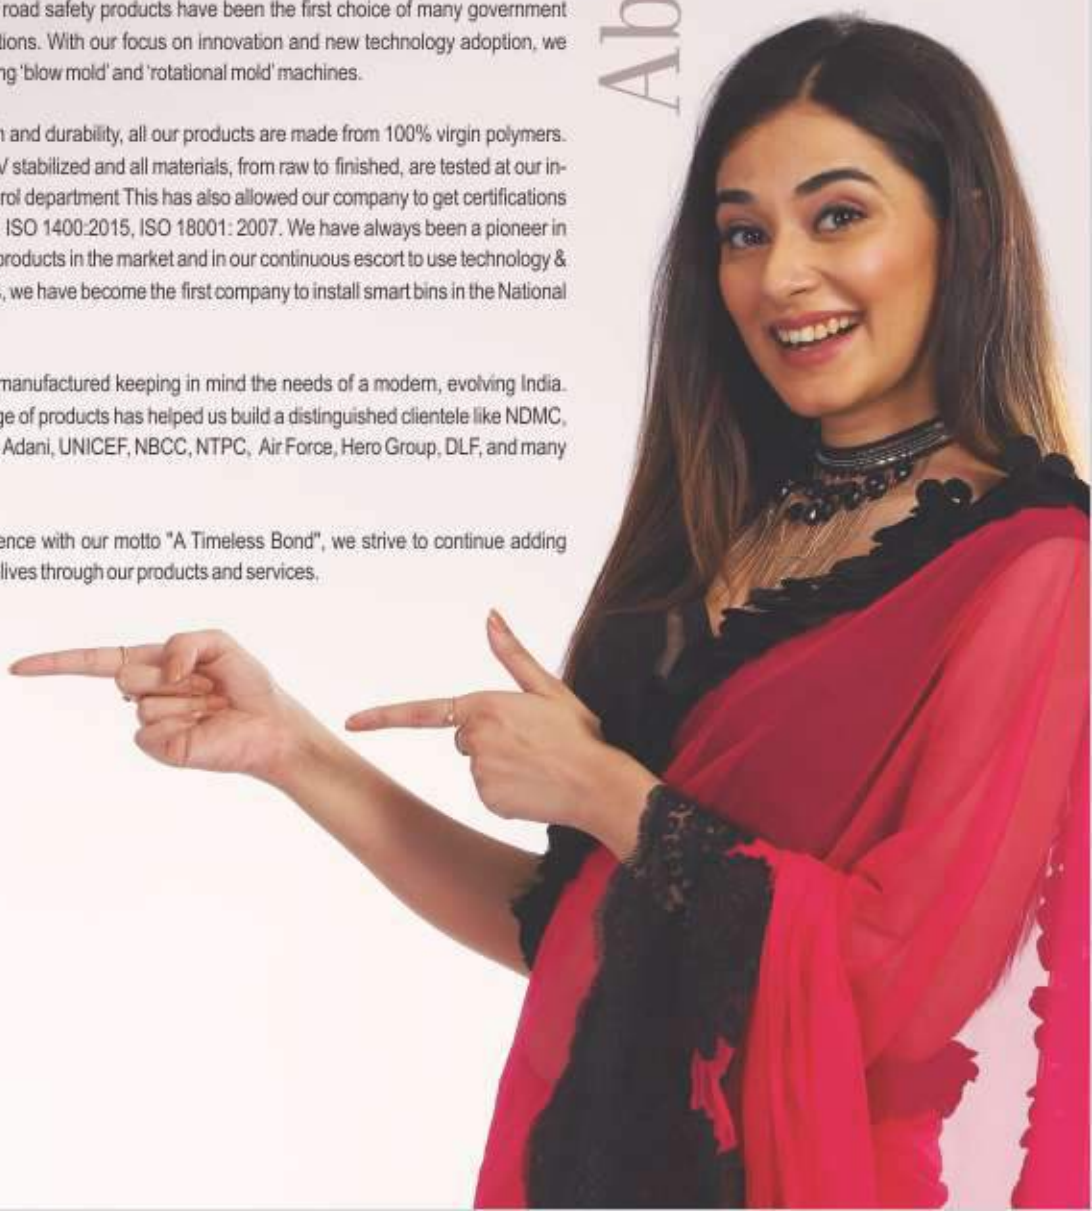

A name that is synonymous with bettering lives, Sheetal Group is a pioneer and leading manufacturer of water storage tanks, taps & fittings, solid waste management products, and road safety products. The journey began in 1989 by launching water storage tanks and soon grew into a trusted name that delivered, "The best quality anytime, every time".

Consequently, Sheetal became the first company in the industry to be accredited by ISO 9001:2001. This was followed by the launch of a range of solid waste management and road safety products. Both these products cater to Sheetal's aim to contribute to the betterment of society, enabling a safe and healthier environment. Sheetal's waste management and road safety products have been the first choice of many government bodies and institutions. With our focus on innovation and new technology adoption, we use industry-leading 'blow mold' and 'rotational mold' machines.

To ensure strength and durability, all our products are made from 100% virgin polymers. Each product is UV stabilized and all materials, from raw to finished, are tested at our in-house quality control department This has also allowed our company to get certifications of ISO 9001:2015, ISO 1400:2015, ISO 18001: 2007. We have always been a pioneer in introducing novel products in the market and in our continuous escort to use technology & IoT in our products, we have become the first company to install smart bins in the National Capital of Delhi.

Our products are manufactured keeping in mind the needs of a modern, evolving India. Our exclusive range of products has helped us build a distinguished clientele like NDMC, TATA Power, L&T, Adani, UNICEF, NBCC, NTPC, Air Force, Hero Group, DLF, and many more.

Creating an eminence with our motto "A Timeless Bond", we strive to continue adding value to countless lives through our products and services.

SHEETAL®
A Timeless Bond

SHEETAL®
A Timeless Bond

Driven by a basic belief that its products must make friends not just consumers, **SHEETAL** has initiated a major exercise in consumer education. The company's trained executives maintain a direct interface with consumers, educating them about the product quality, convenience and maintenance.

Also believes that consumers must get the best out of its products & money worth. Hence it has evolved a set of consumer guidelines. These guidelines, when followed, ensure optimum and trouble-free performance of **SHEETAL** products for years to come.

Design-research & Development

We will help you select the right style, which meets the specific needs of your project. The CAD/CAM equipped design studio uses the latest softwares to carry out designing functions and define technical specifications.

Tooling

The combined expertise of our toolmakers and the versatility of our equipment unite this department in the development of prototypes in readiness for product launches.

Machining

Machining is done on CNC lathes ensuring accuracy and consistency.

Foundry

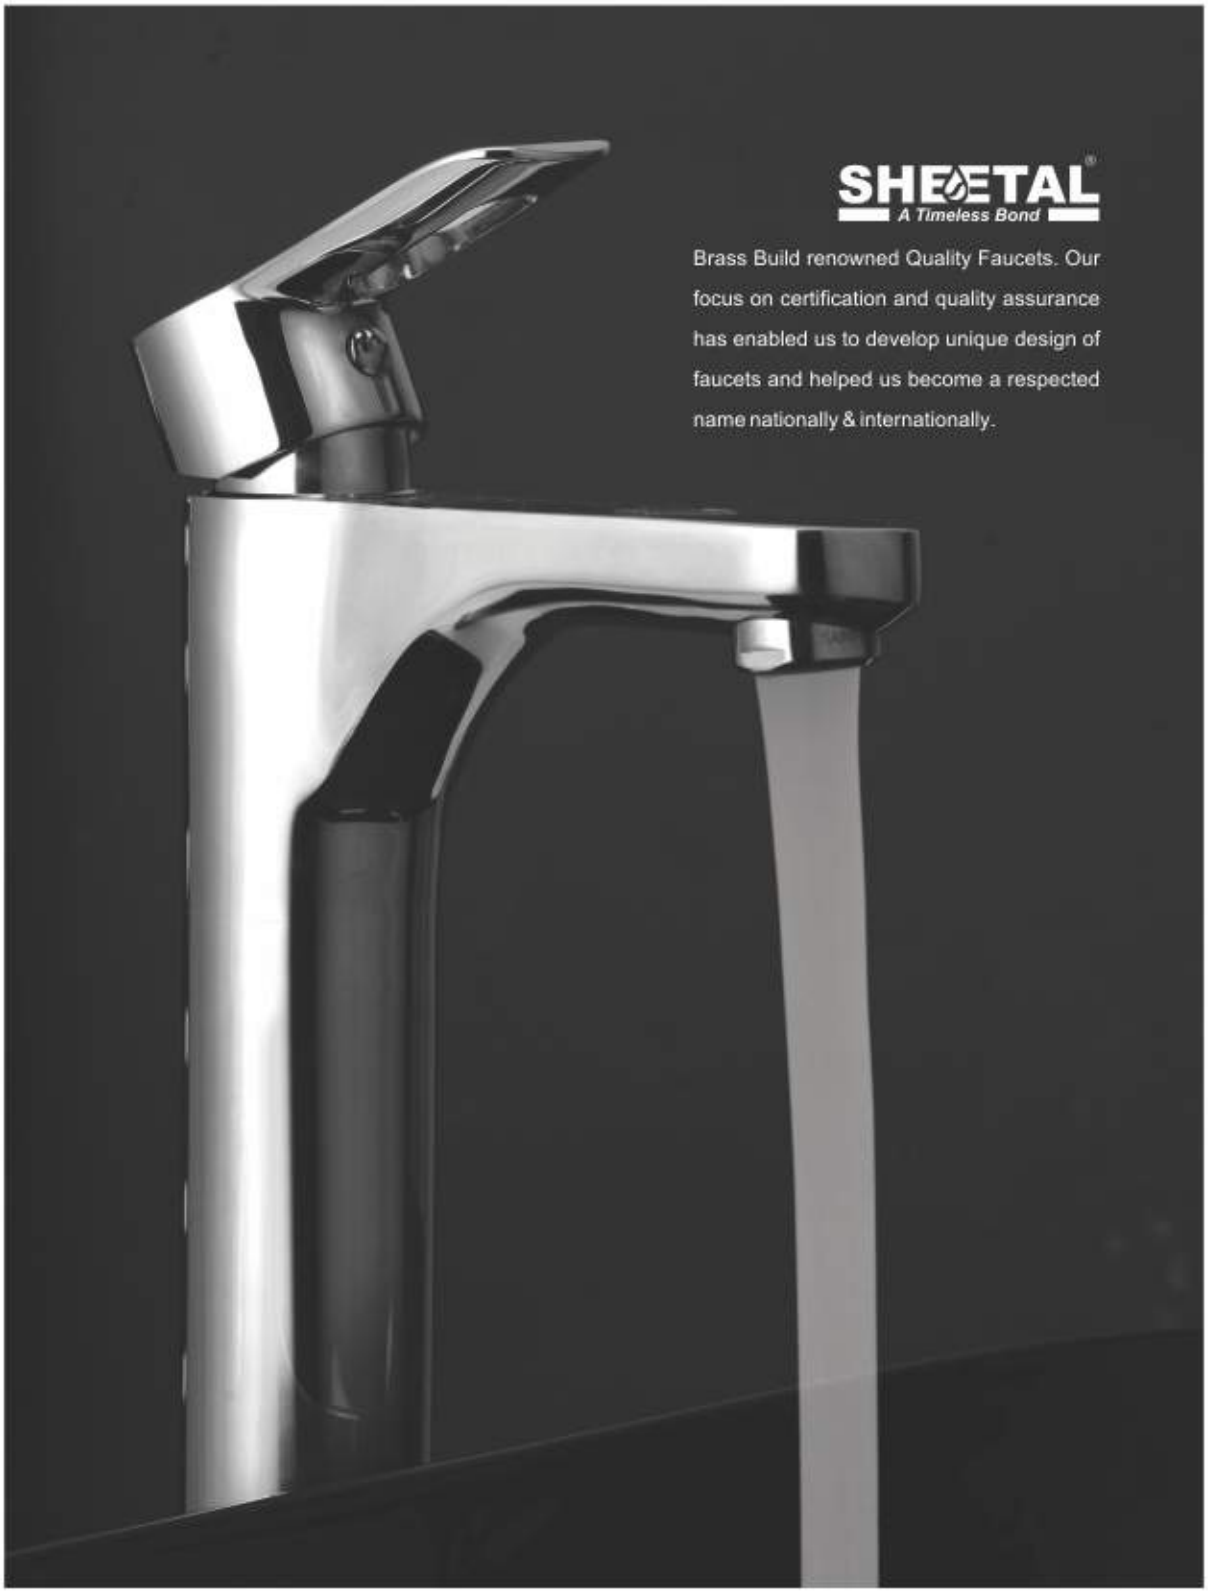

The selection of alloys and the experiences of our moulding technicians are essential to achieve the finished product of great quality. Brass inglots of defined compositions.

Polishing

The preparation of products using automatic controlled systems reduces tedium and concentrates the expertise of the employees on the complex aspects.

Plating

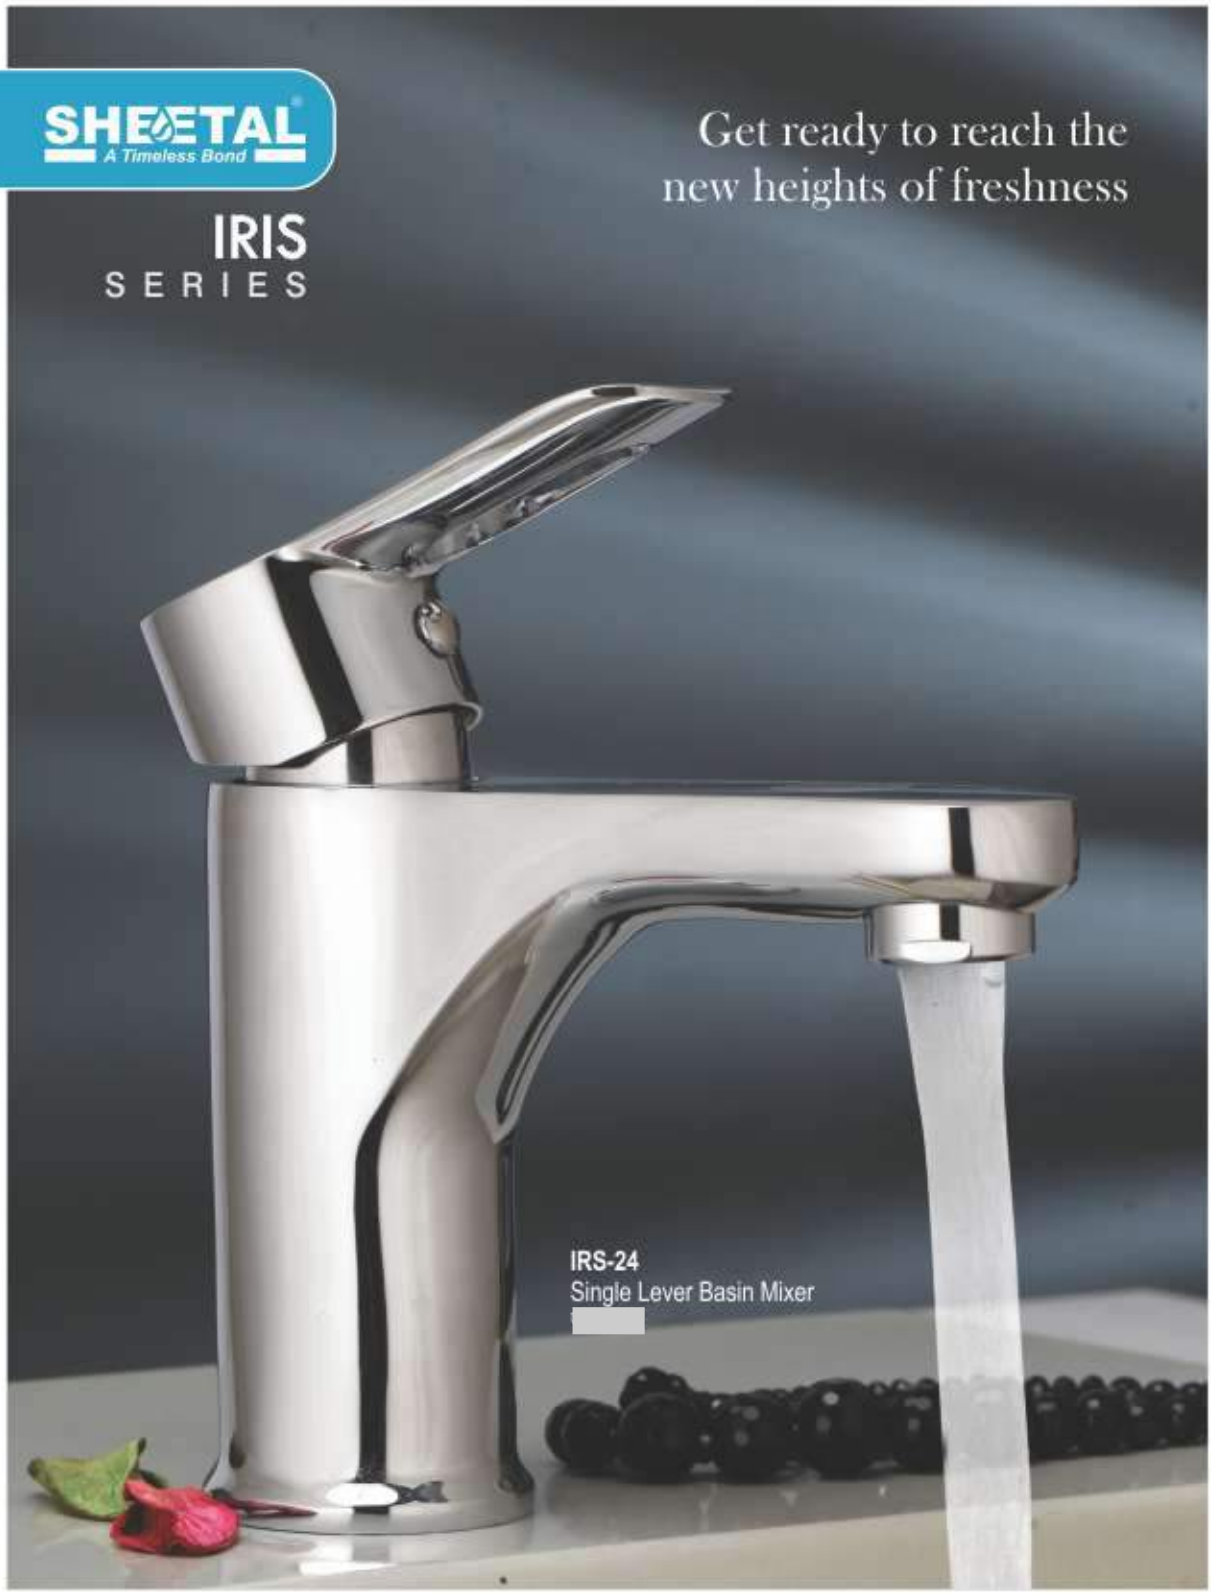

While complying with the most constraining environmental standards, we achieve tofinish our products according to the desires of our customers by using the three layer electroplating technique thus increasing longevity and providing superior finish.

SHEETAL
